Valve Cover Gasket(s)
Remove and Replace components as required to access and install materials, and/or perform needed service, adjustments as required. Additional fluids may be required to complete this service. Retest and verify repair as required. Perform final road test where applicable.

Tech Comments: Removed engine covers, intake ducting, engine mount, coil packs. Removed valve covers. Cleaned and inspected sealing surfaces. Noticed a small amount of camshaft wear on both of the intake camshafts, nothing to be concerned about at the moment but worth noting. Re-installed valve covers with all new gaskets and torqued to spec with new bolts. Re-installed all previously removed components and filled engine with new oil.
